

The Zodiac in relation to Colors & Crystals

Valerie Bottazzi

There are many archetypal systems that include colors, such as Astrology and Crystals to name a few.

As per your request during the LIVE webinars, I am including a chart that connects all three systems. I hope you enjoy playing with them. One example could be using the color of your own zodiac sign in a meditation when you need the strengths inherent to you Sun nature; another example could be using the crystal to help you get energised. In both cases you may chose the color or crystal relating to you Sun sign or your ascendent. You can also use this additional information for your business and branding. :-)
